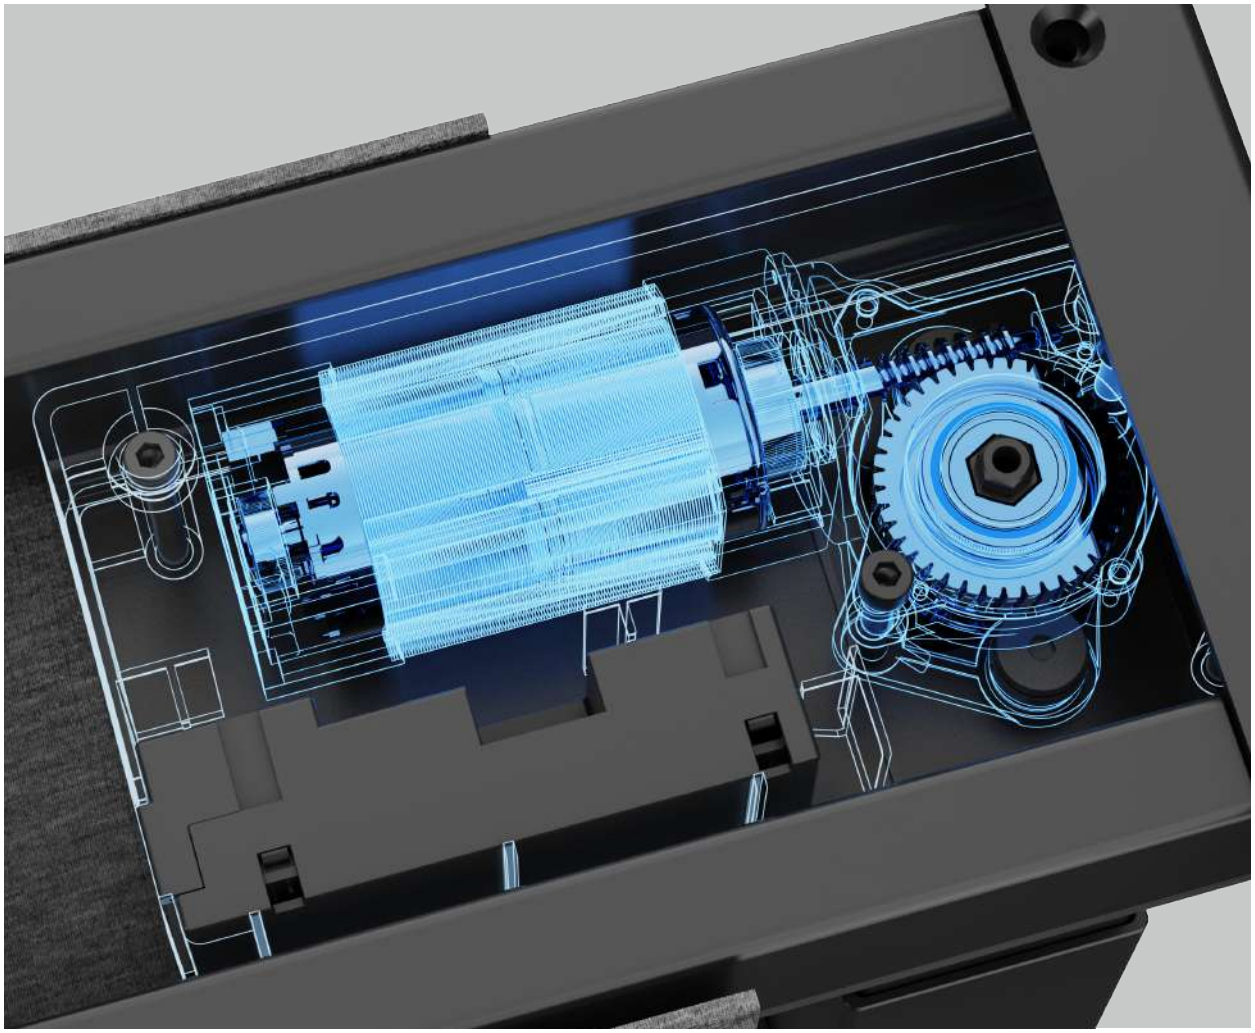
Height Adjustable Standing Desk

Features

Strong Load-bearing Capacity and Durability



Long-life and high reliability

Brushless motors, with electronic commutators， reduce vibration due to the lack of brushes and commutators.

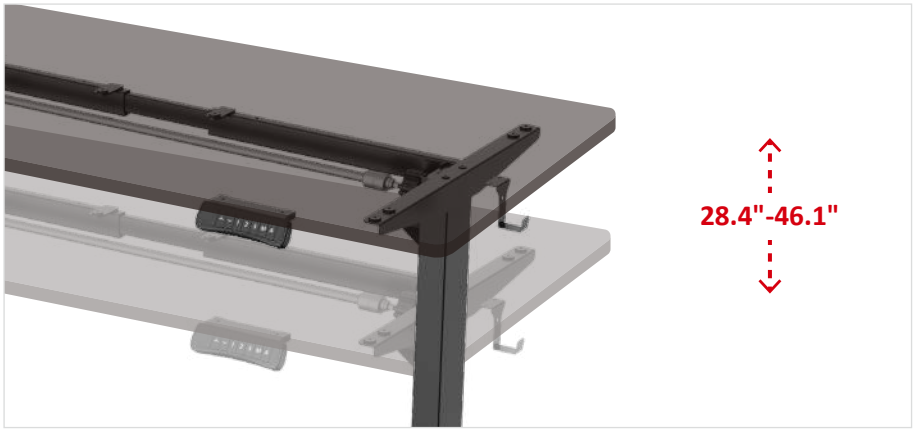
Smooth Transitions

The dual-motor system runs more smoothly with brushless motor technology, delivering rapid response,quick acceleration, and high positioning accuracy， and minimizing the amount of annoying overrun.

High efficiency and low energy consumption

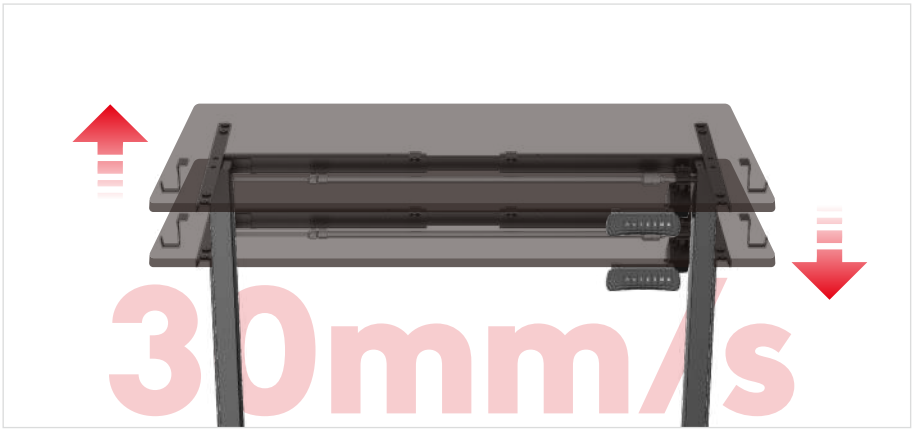
This interaction between the magnetic field and current is more efficient than in brushed motors, where brush and commutator issues can hinder current flow and lower efficiency.

Features



Electric Height Adjustment

Give you the freedom to switch between sitting and standing



Seamless Movement

Ultra-responsive 30mm/s lifting with zero lag

Large Load Capacity

Can support a maximum weight of 176lbs

Equipped with Hooks

Convenient access to items

Height Adjustable Standing Desk

- **Adjustable Desk Frame**
- **Large Load Capacity**
- **Equipped with Hooks**

Single Motor

2-Stage

Rectangular Column

SPECIFICATIONS
